🔧 Front-End

React | Nextjs | Typescript | Vuejs
Tailwindcss | Bootstrap

🔧 Back-End / API

PHP | Laravel | MySQL | Mongo DB |
Stripe

🔧 Others

Git | Figma | Photoshop

PROFILE

As a full-stack web developer, I specialize in crafting high-quality digital experiences with a focus on performance and usability. With React and Vue.js driving the front end, and Laravel powering the back end, I've built applications ranging from AI-driven tools to enterprise-level solutions like lead management systems and HRM platforms. My expertise spans from developing new features to managing and optimizing existing systems.

EXPERIENCE

FULL-STACK DEVELOPER

Coders Passion ● Jul 2022 - Present

- Part of a development team for 'leadcenter.ai,' a lead management software built with Laravel and Vue.js. Responsibilities include adding new features, implementing design and functional changes.
- Developed a full-stack AI room decorator app using React, Next.js, MongoDB, and Stripe. Task included replicate API & credit-based purchases and subscription management implementation.
- Currently managing howardbailey.com, a website built with Craft CMS. Currently I'm responsible for implementing client-requested design changes and new feature development.

JR. BACKEND DEVELOPER

Glorious IT ● Dec 2022 - June 2023

- Collaborated with a team to enhance POS, ERP, and HRM systems by developing new features, primarily using PHP and Laravel.
- Developed a Laravel application that integrates with attendance devices to sync data with the live HRM database, deployed successfully for three clients.

PROJECTS

Some web applications that I've built.

- Project Management System
- Agency Website
- Ai room generator website
- Giftcard selling website
- Real-Time Attendance Data Sync Application
